Revising an SFI Entity is a four-step process including Step 1: Screening Questions, Step 2: Significant Financial Interests, Step 3: Relationships, Step 4: Certify.

Note: PHS/NIH Investigators and Key Persons must submit or update a disclosure within 30 days of discovering or acquiring (e.g. through purchase, marriage, or inheritance) a new significant financial interest.

Step Two: Significant Financial Interests

Instructions for Significant Financial Interests will display. For a definition of what constitutes a Significant Financial Interest and what is considered exempt, click the question mark icon.

1. Click the Continue button.

The Significant Financial Interests for <Lastname, Firstname> screen will display.

1. All Active and Inactive Significant Financial Interests will be listed. Travel Only Entities (added during Travel Disclosure) appear in the lower portion of the screen. You will be required to answer questions and describe the relationship between all Active SFIs and your Project in completing your Proposal Disclosure.

2. Review the SFIs listed. Click Edit to view details for the SFI and modify as needed. You may make an existing SFI Active or Inactive by clicking the link to the right of the listing. Use the Add Significant Financial Interest button to add an SFI.

Click to refer to data you entered in a previous COI module

Edit to modify SFI
Make Inactive if SFI is no longer current.
Make Active if an SFI previously labeled Inactive is now current

If you Quit before completing, you must return to CoeusLite My COI and click the Other Disclosures in Process button from under the Revise heading to access the Revise disclosure.
Make Inactive

Once created, a Significant Financial Interest will remain as part of your Master Disclosure permanently. SFIs may be marked "inactive" but can never be deleted because they must remain part of the historical record. If a SFI listed no longer meets the criteria of a Significant Financial Interest, or if you no longer hold that financial interest:

1. Click the Make Inactive status link.
